1 Taking care of your hearing aids

2 Be careful with your hearing aids

3 Parts of a hearing aid

CHAPTER 1

Taking care of your hearing aids.

Taking care of hearing aids is important.

When you wake up make sure your batteries

are working by opening the little door and taking

the battery testet and make sure the battery is

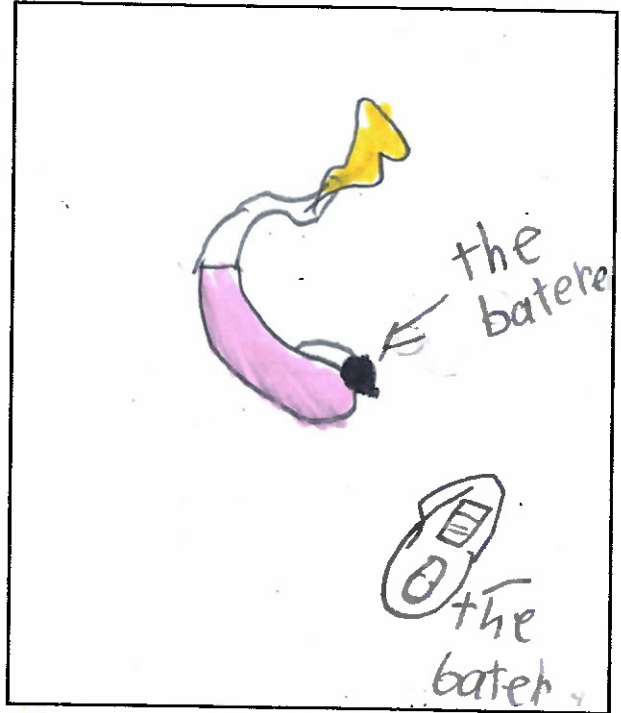

working. When you go to sleep put the

hearing aids in the dry and store case. If you hear a

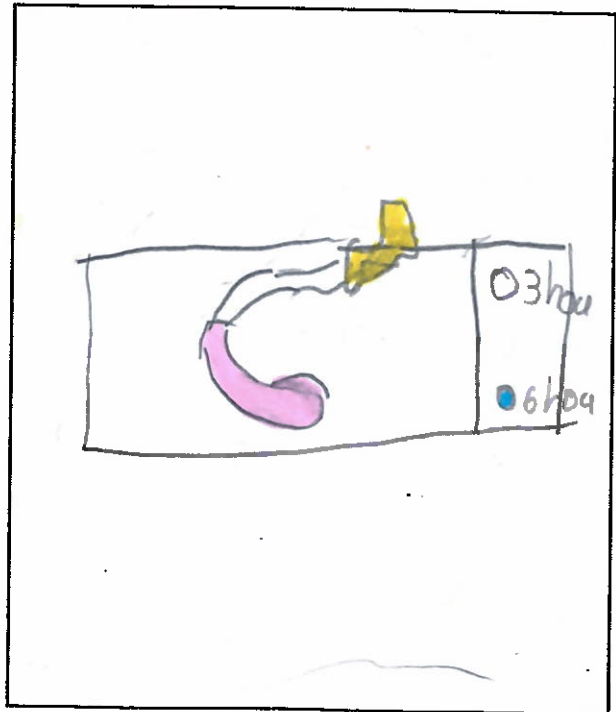

beep change the batteries by opening the little

door on the hearing aids. You should all

ways take care of you hearing aids.

CHAPTER 2

Be careful with your hearing aid.

There are many things you shouldn't do with your hearing aids. Never put your hearing aids in water. Do not keep your batteries on when you are not using them.

It will waste the batteries. You should never lose your hearing aids. They cost a lot of money.

Taking care of your hearing aids is super important.

CHAPTER

3

Parts of a Hearing Aid

There are a lot of parts of a hearing aid.

The ear mold is what goes in the ear. The tube is connected to the ear mold. If there was no tube nothing would be connected together. The transmitter is like the speaker to hear far away. All of these parts make up a hearing aid.

ALL ABOUT THE AUTHOR

Salma love's rainbows, books and her BFF
and her family. She does not like dead animals.
One thing she wishes is that every one in the
world can be happy forever.

NOTES FROM MY CLASSMATES
